Career development program

The Career Development Program for foreign student in Japan will promote the acceptance and employment of exceptional foreign students to meet the goal of fostering innovative human resources.
In 2009, the Japanese government (MEXT) selected the Graduate School of Agriculture, Kagawa University as a center for excellence in Safety for foods in Japan. Due to governmental reform last year, this program is managed independently without government support.

Program goals

Kagawa Prefecture hosts many multi-national companies that are leading food importers. The Kagawa University Career Development Program will enable foreign students to become leaders that can develop food safety systems and business globally.
